**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Please do not end regulated wholesale access to the Unbundled Elements (Copper Pairs) of the Telephone Network that the people of the United States paid for through our taxes. I have tried each of the three internet services available to me and the best and by far the least expensive is my local internet company. Why would the FCC foster less competition and the loss of jobs by deliberately causing the closing of thousands of small independent companies across the country in favor of large monopoly companies? The only answer is that the FCC is working for these companies instead of the people of the United States. The FCC is suppose to be looking out for the people.

Please do not shut off local internet provider companies from their access to their main Internet Transport medium, the Public Switch Telephone System, (PSTN). Please show that you are working for the people of the United States of America.
